

NJDEP Workshops

NJPDES MUNICIPAL STORMWATER PERMITS

**Three Regional Seminars for
New Jersey Municipal Officials:**

MAY 29, 2003

North: Rutgers University, Newark

JUNE 11, 2003

South: Rowan University, Glassboro

JUNE 18, 2003

Central: Cook College, New Brunswick

**IN COOPERATION WITH THE NEW JERSEY
STATE LEAGUE OF MUNICIPALITIES**

NJPDES MUNICIPAL STORMWATER PERMITTING IS HERE!

New Jersey Pollutant Discharge Elimination System (NJPDES) Municipal Stormwater Permits are becoming a reality this year. Proposed regulations and draft permits were published in January, and are scheduled for adoption this summer. The regulations and draft permits include deadlines for municipalities to apply for appropriate permits and develop and implement a Stormwater Program under those permits. The Municipal Stormwater Regulation Program assigns the State's 566 municipalities into 467 Tier A Municipalities and 99 Tier B Municipalities. The morning session of this one-day program will explain the requirements that affect both Tier A and Tier B. The afternoon session will address the requirements that affect Tier A only.

The workshop, conducted by the NJDEP's Bureau of Nonpoint Pollution Control and the Division of Watershed Management, will cover the following Statewide Basic Requirements (SBRs):

- ◆ **Public education (Tier A & B)**- Provide education on the following topics: stormwater/nonpoint source pollution, storm drain labeling, waste disposal, fertilizer and pesticide use, pet waste, litter, and wildlife feeding.
- ◆ **Improper disposal of wastes (Tier A)** - Adopt and enforce ordinances to control pet waste, litter, wildlife feeding, and yard waste. Eliminate illicit connections to storm sewers and map all outfall pipes.
- ◆ **Solids and floatables controls (Tier A)** – Prevent solids and floatables through street sweeping, retrofitting storm drain inlets and stormwater facility maintenance, road erosion control and outfall pipe stream scouring.
- ◆ **Maintenance yard operations (Tier A)** – Eliminate or minimize pollutants from public works facilities including storage of deicing material, fueling operations, vehicle maintenance, and equipment and vehicle washing.
- ◆ **Employee training (Tier A)** – Conduct employee training for municipal staff on permit measures.

Agenda Topics

Morning Session (for both Tier A and Tier B Municipalities)

- ◆ Overview of the General Permit
- ◆ Municipal Stormwater Management Plans and Ordinances
- ◆ Storm Drain Inlet Design
- ◆ Public Education Requirements
- ◆ Q & A Session

Afternoon Session (for Tier A Municipalities Only)

- ◆ Improper Disposal of Waste
- ◆ Solids and Floatables Controls
- ◆ Maintenance Yard Operations

WHO SHOULD ATTEND THE NJPDES MUNICIPAL STORMWATER PERMITS WORKSHOP?

Mayors, municipal engineers, managers and their staff,
public works directors, and planners

**PLEASE NOTE: Attendance at this program is strictly limited to
municipal officials and their duly authorized representatives.**

➔ OTHER UPCOMING NJDEP WORKSHOPS ➔

Stormwater Management Rules

Date: TBA

The NJDEP will also present a separate workshop explaining the technical requirements contained in the Stormwater Management Rules (N.J.A.C. 7:8). These rules provide for increased protection of water resources from new development.

Stormwater Management for Engineers **June 16-18, 2003**

This three-day program will present the most up-to-date information on the scientific and regulatory aspects of stormwater management. The course will cover the recently proposed NJDEP Stormwater Management Rules including those dealing with groundwater recharge, TSS and nutrient removal, and Stormwater Quantity control. Other discussions will include the forthcoming revisions to TR-55 and the beta test version of the program.
